The interest would amount to only about \$5,700 00, while to issue certificates payable in 1853, the interest thereon would be \$22,800 00; it was therefore a matter of policy to borrow this money. He did not contend that the issue of certificates would be a violation of the faith or contracts of the State; but by borrowing this money, the credit of the State would not only be sustained, but a vast saving of interest and expenses gamed. We have to do one of two things-either issue contificates or borrow money; it was for us now to determine which is the better plan-which would the better sustain the honor and credit of the State?
